

DIRECT-ACTIVATED PRESSURE SUSTAINING / BACK PRESSURE VALVE

- ▶ The whole set is made by stainless steel #316, and it is suitable for the fluid of pure water, acid & alkaline fluid, steam or air. Pressure needed from fully-closed gate to fully-opened gate: 1.5 kgf/cm².
- ▶ Back pressure valve can maintain required pressure.
- ▶ Design of piston and diaphragm improves the inability of sustaining pressure and leakage.
- ▶ Back pressure chamber controls the valve gate and let gate respond, quickly and adjust pressure accurately.

▶ Pressure Adjusting Range : 1~5 kgf/cm² (1 kgf/cm²=14.2 psi) 4~10 kgf/cm²

► Applied Temperature : -15~100°C

100~180°C (For steam)

- ▶ Valve Body Testing Pressure : 35 kgf/cm²
- Maximum Applied Pressure: 25kgf/cm²
- ▶ Pressure gauge indicates the sustaining pressure.
- ▶ Please cover steam pipelines with thermal materials

| No | Part Name | Material Stainless Steel | | |
|----|----------------|-----------------------------|--|--|
| 1 | Gauge | | | |
| 2 | Upper Cover | Stainless Steel 316 | | |
| 3 | O-ring | NBR / Viton | | |
| 4 | Main Body | Stainless Steel 316 | | |
| 5 | U-ring | NBR / Viton | | |
| 6 | Shaft | Stainless Steel 316 | | |
| 7 | Sealing Spacer | NBR / Viton / Teflon | | |
| 8 | Seat | Stainless Steel 316 | | |
| 9 | Diaphragm | CR/ EPDM/ Viton | | |
| 10 | UH-ring | NBR / Viton | | |
| 11 | O-ring | NBR / Viton | | |
| 12 | Fixed Bolt | Stainless Steel 304 | | |
| 13 | Spring | Spring Steel | | |
| 14 | Lower Cover | Stainless Steel 316 | | |
| 15 | Washer | Brass | | |
| 16 | Adjusting Stem | Stainless Steel 304 | | |

(Thread End)

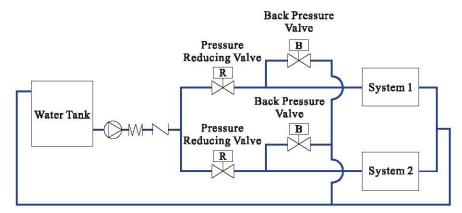

| Item No | Size | H(mm) | L(mm) | Weight(kg) | CV |

- ▶ Back Pressure (Sustaining) Valve:
 - It's installed in branch pipe to maintain the stable pressure of fluid inside pipe. When pressure exceeds setting valve, it will automatically release over high pressure.
- ▶ Pressure Relief Valve:
 - It's installed in branch pipe. When pressure exceeds setting valve, valve gate will quickly and fully open to release pressure. As pipeline pressure goes down to certain level, valve gate will close slowly.
- ▶ Applied condition of Back Pressure Valve:

Example 1

OIn different pressure systems of processing pipelines, installing back pressure valve can maintain required pressure of the systems and ensure safe ues of equipments after pressure reducing valve reduces pressure.

Example 2-

OInstalling back pressure valve enables largest flow application and also stablize pipeline pressure.
